Complimentary Synergy Tech Suite Platform Features to Help You Navigate COVID-19

Synergy Tech Suite is dedicated to helping you mitigate risks and offset staffing disruptions while maintaining the highest levels of dining services and family member outreach for your residents & patients during this period of limited communal dining and visitor restrictions. We are pleased to offer the following solutions to address the needs of both independent living and care communities while the COVID-19 outbreak is affecting your operations.

'NEW' Self-Ordering Portal

Allows your independent residents who own a personal tablet or computer to place orders directly from the safety of their rooms.

For residents without a personal device, a staff member can quickly share what's on the menu and accept orders for several days in advance .

Advanced Ordering Module

Visit your patients to take their meal orders up to 7 days in advance on a tablet or laptop computer.

Orders may also be placed via phone for those without a personal device or who require more limited engagement.

Service Dashboard

View the service dashboard on a tablet or PC to quickly see which residents have ordered, who refused a meal and who still needs to place an order.

Closely monitor diet orders and allergy changes as well as all new admissions.

Self Ordering Portal

Welcome!

We're glad you decided to use the MealSuite Touch Advanced Ordering System. Use of the Advanced Ordering system will provide you with many benefits, including the ability to:

- Visit your patients to take their meal choices up to 7 days in advance on a tablet or laptop computer. You may also collect orders over the phone.
- View the service dashboard to see which patients need an order placed, are on a new diet order or have been recently admitted.
- All orders are transmitted to your MealSuite system, enabling you to accurately predict your production requirements. Easily print your delivery tickets a few minutes before tray delivery begins to simplify operations.

First thing's first, let's confirm we have the right information:

Printing Options

1) Print at no cost using your current laser jet printers

- Log in to your Synergy system 30-40 minutes prior to meal service and print tickets for the current meal.
- Then just cut the tray cards to separate them, or you can purchase perforated paper for easier separation.

FREE Option

2) Purchase a 'Star Micronics Printer' from Synergy Tech Suite

- This option can be programmed to automatically print tickets at a designated time prior to each meal service.
- Simply requires a network connection, power source and receipt paper.
- The tickets will be pre-cut so that you can simply sort and start production.

Discounted Price of \$582.75 CAN per printer
Receipt Paper \$49.99 CAN per box

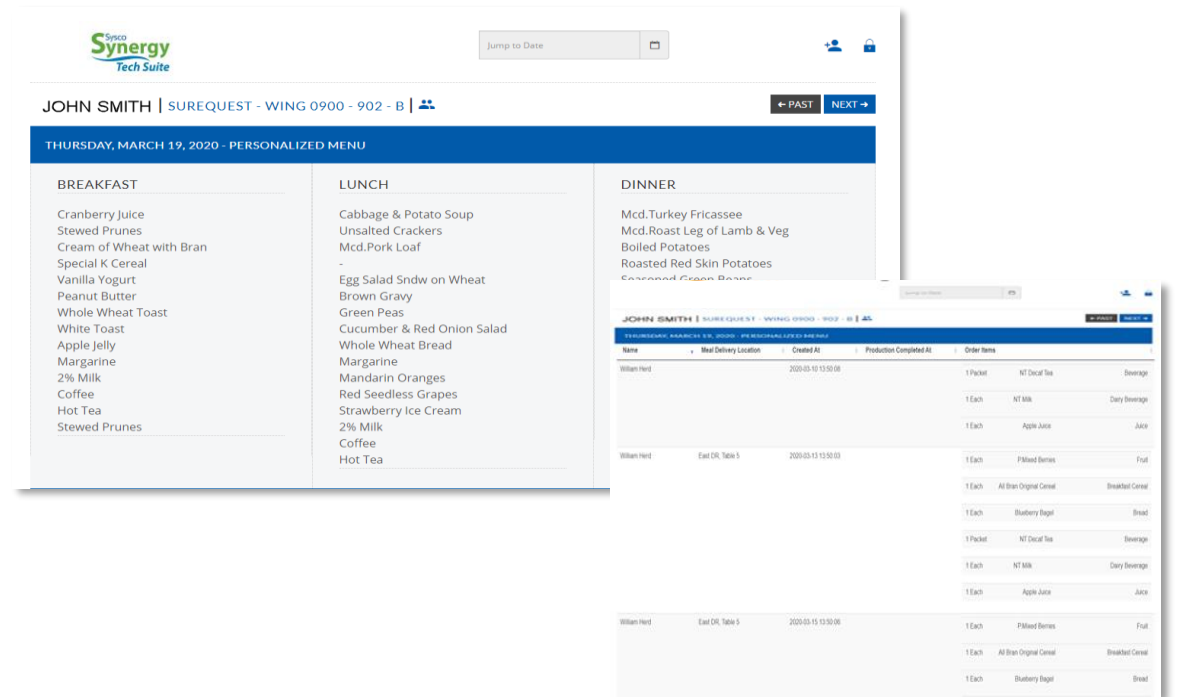

Family Portal

Allows Family Members to remotely view menus & monitor meal histories

- Menus are based on the resident's specific dietary requirements, not just the regular menu
- Family members can view and monitor the resident's order history for improved choices
- Access to the system is based on the permissions allowed by your community – the customized site will display your community's logo.
*There is a **\$700 fee** to offset MealSuite's cost to complete the associated setup (50% discount just to recover our costs).
