

## **Metropolitan Stocked Beef Cuts**

Click on Beef Cut Section above, this will take you to stocked items for each cut.

Click for **Grinds** 

Click for **Grading and Brand Definitions** 

#### GRADING and BRANDING

SNAKE RIVER FARMS BRAND: Wagyu beef is highly sought after because of it's intense marbling and high percentage of oleaginous

unsaturated fat. American-style kobe beef is the result of cross-breeding Japanese Wagyu cattle with continental breeds of cattle, resulting in a marbling that far exceeds the USDA standards. BLACK line of beef

has a Japanese marbling score of 6-8, whereas the GOLD line's score is 9-12.

Note: Wagyu beef grinds and patties imported from Australia is "Greg Norman Brand".

**USDA PRIME:** Beef is produced from young, well-fed beef cattle. It has abundant marbling. Less than 2% of cattle harvested fall

into this category.

CERTIFIED ANGUS BEEF BRAND (CAB): Beef selected must adhere to 10 scientific specifications. Upper 2/3 of USDA Choice and above grade allowed into the program. Modest or higher marbling. Consistent sizing, superior muscling, no dark cutters. To earn

the Certified Angus Beef brand name, cattle must first be Angus-influenced, with a predominantly solid black coat, only

3 in 10 Angus cattle meet the CAB high standards.

GRASS RUN FARMS BRAND: 100% grass-fed beef delivers less total fat, saturated fat, cholesterol and fewer calories to help support a healthy

consumer diet. Raised with no antibiotics, hormones or growth promotants, 100% grass-fed beef is available in

USDA Choice and Prime grades.

**ASPEN RIDGE BRAND:** All natural beef that is part of a never-ever program means the cattle have never been given any growth promotants,

antibiotics, or animal by-products. Angus breed-specific, this cattle is born and raised exclusively in the U.S.A. and is 100% vegetarian fed. A third-party animal handling certification guarantees the humane raising and handling of the

stock. A fresh, clean tasting experience is what you get with an all natural cut of beef.

Beef is high quality with small to moderate marbling. Choice grade beef comes from young cattle and will be flavorful and **USDA CHOICE:** 

adaptable to all cooking methods.

**USDA SELECT:** Beef is very uniform in quality and normally leaner than the higher grades. It has a minimum of marbling. It is fairly tender,

but because it has less marbling, it may lack some of the juiciness and flavor of the higher grades.

NO ROLL: A term used to describe beef that has not been graded by the USDA. Beef carcasses graded by the USDA have a grading stamp rolled on the exterior fat of the carcass to identify the grade of the meat. Carcasses not graded have no USDA rolling stamp, hence the name "No-Roll". Unlike the mandatory USDA safety inspection paid for by the government, grading of beef is optional and is paid for by the

processor. Since only the best grades of beef (Prime and Choice) justify the expense of optional grading, a large share of the beef sold

in the United States is not graded, including much of the imported product.
