Features & Benefits

Work smarter and simplify your workflow. Let Optimum Control do the heavy lifting in your inventory management, lowering costs and maximizing profits.

Recipe Costing

- Determine exact recipe cost and margin
- Include detailed preparation instructions along with plating pictures
- Optimize selling price based on target cost %
- Calculate nutritional analysis and allergens on every menu item

Sales Analysis

- Analyze the theoretical cost of goods
- Import item sales from most POS systems
- Itemize Waste by raw item or finished recipe
- Create a cost of goods report daily
- Catering and banquet costing

OC Enterprise

- Consolidated above store reporting for multi-unit operations
- Manage inventory items and recipes from a central web portal
- Drill into Sales mix, Purchasing and Actual vs. Theoretical usages for every store

Ordering & Purchasing

- Order from multiple suppliers at once
- Export orders to many popular suppliers
- Price changes flow through to all recipes
- Import invoices electronically

Inventory

- Count inventory by full case, split case and even recipe units
- Customize count sheet to match your storage locations
- Enter counts for as many locations per item as needed
- Detail amounts of batch recipes on hand
- Value inventory using FIFO, Last Cost or Average Cost

OC Mobile

- No more paper, send count sheets to your mobile device
- Avoid errors copying numbers from count sheets into Optimum Control
